# intro

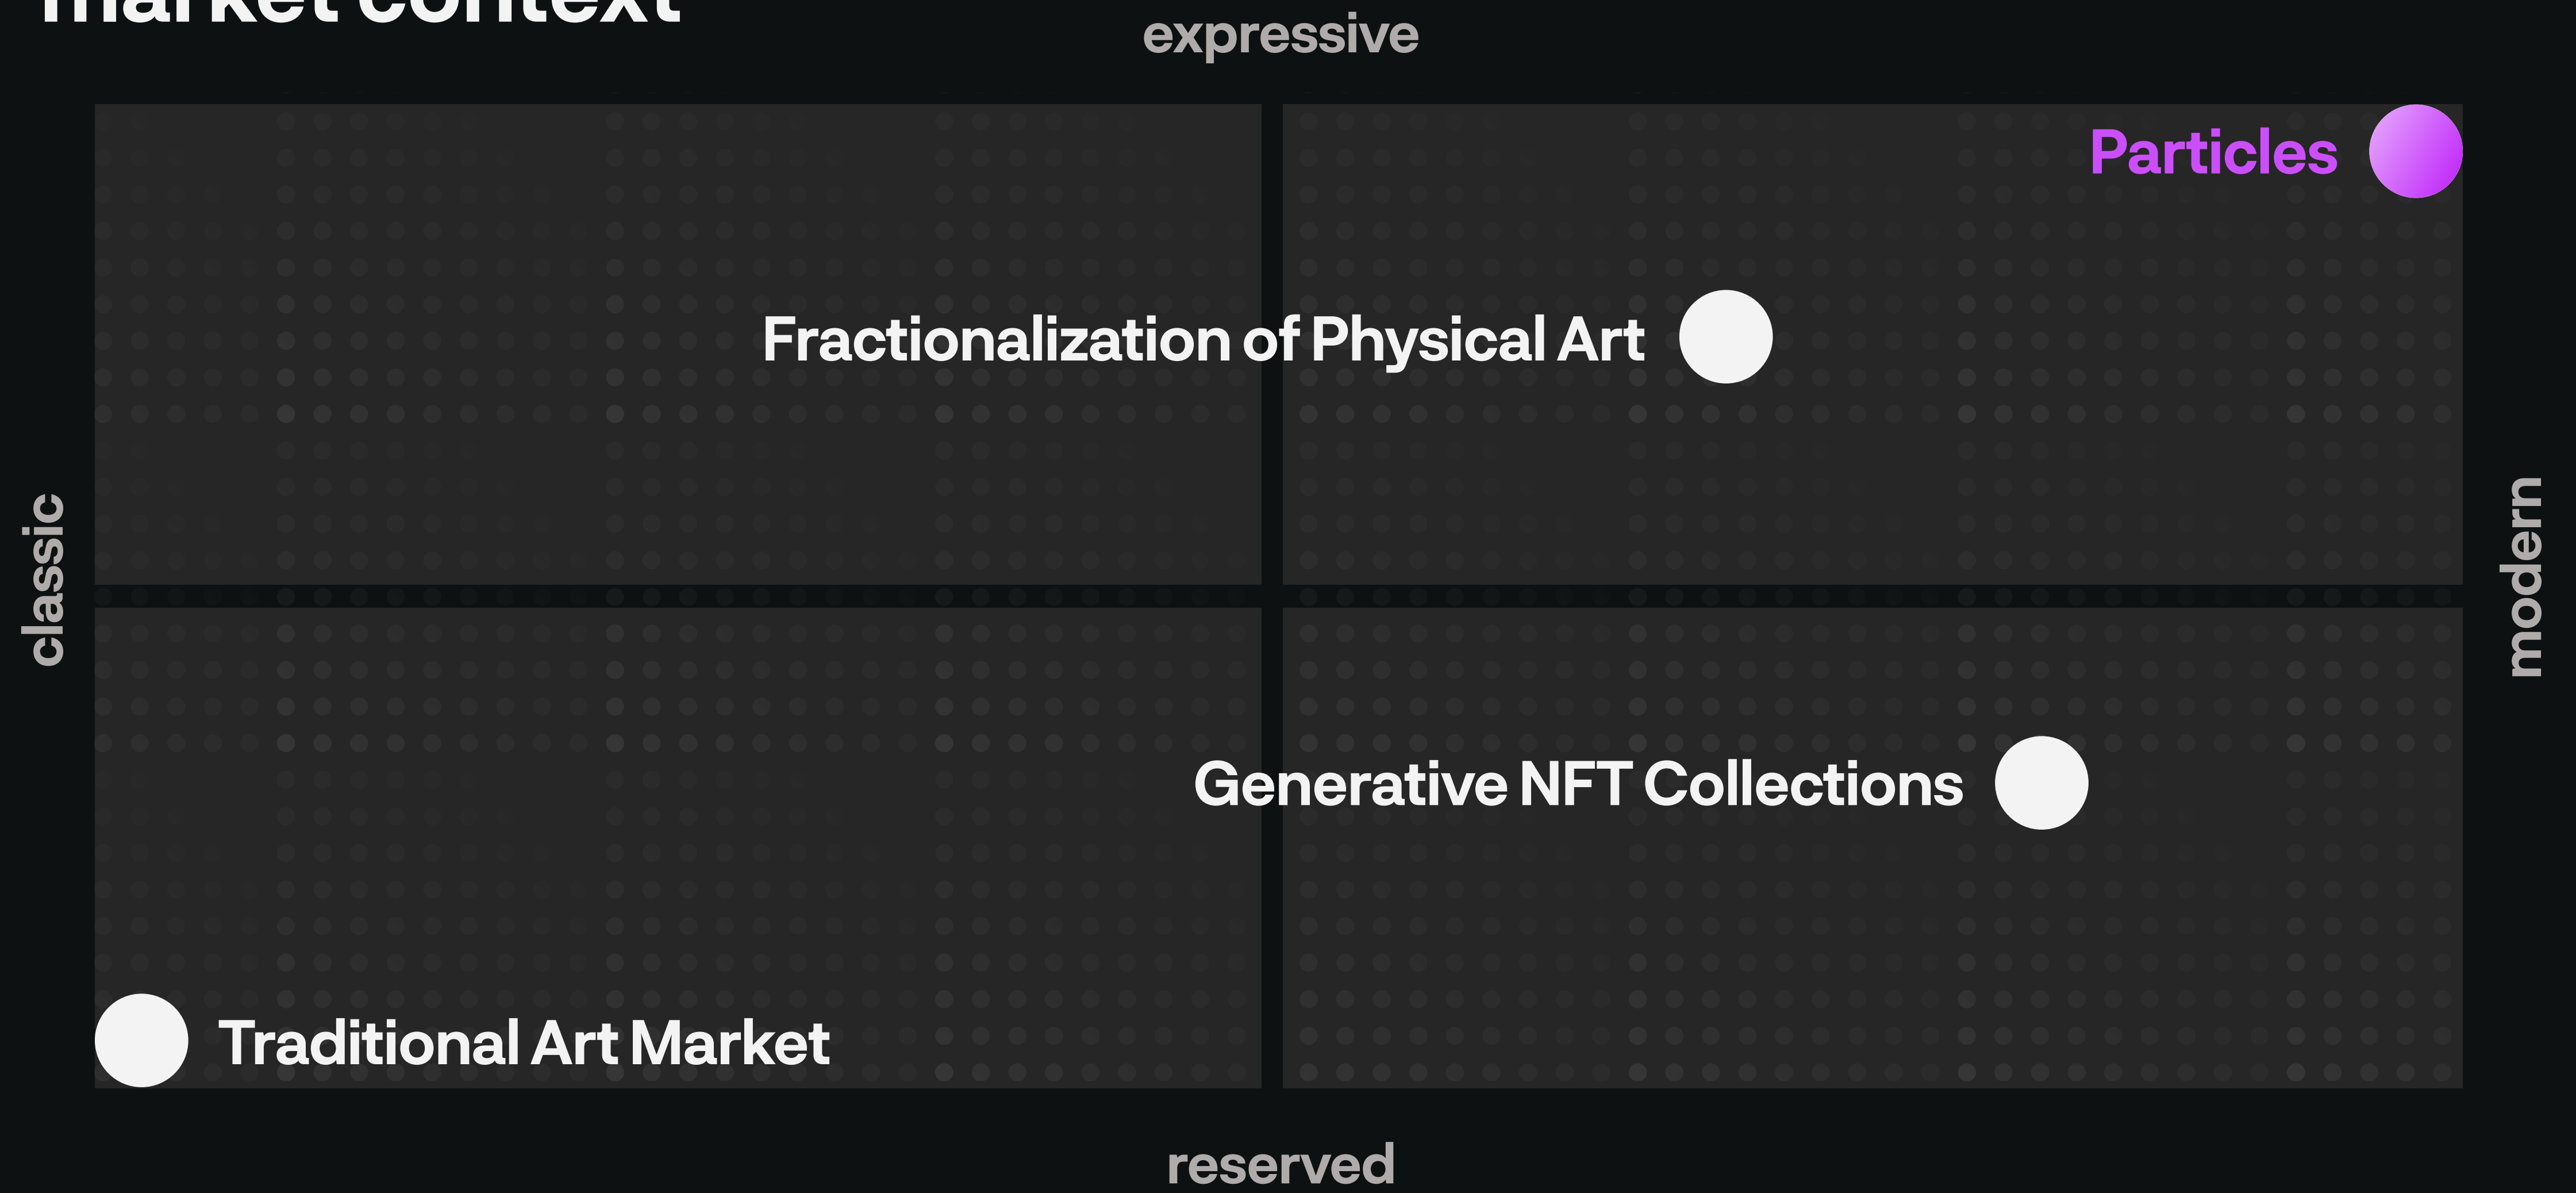

Artists have had their visions muddled, royalties pilfered, and independence taken by middlemen in the current creator economy.

Particles believes that NFT technology can be leveraged to revolutionize this industry through the democratization of art .

**\$000** serves as the vehicle to empower & educate the creators and collectors exploring this new page in human culture.

# market context

# problems

## Traditional Art Market

Gatekeep the industry, excluding new participants through high barriers of entry.

## Fractionalization of Physical Art

Highlight established artists over talented underdogs, missing out on the next Da Vinci.

## Generative NFT Collections

Obscure the inherent value of on-chain art via association with derivatives & rug pulls.

# solutions

## **Democratized Art Ownership & Accessibility**

Trending artwork,  
curated & owned by  
the community.

## **Open Sourced Tools & Education**

Providing the latest  
news in the space  
whilst uplifting &  
onboarding new  
artists and collectors.

## **Community Impact & Empowerment**

Investing in up and  
coming artists to  
accelerate innovation  
and spark creativity.

**utility** **\$000** / A utility token unifying value for the NFT Art space, granting access to:

### **Redeem Iconic Artwork**

The token mechanics provide opportunities for arbitrage.

Increasing the buyout price of one artwork results in discounts on others.

### **Premium Analytics**

Discover market insights and developing trends.

A dashboard for artists to track sales history, interact with collectors, and more.

### **Dedicated Artist Advising**

Artists can use \$000 to schedule personalized advising sessions with experts in the space.

# supply mechanics

## token minting

**\$000** is minted when DAO held artwork is fractionalized.

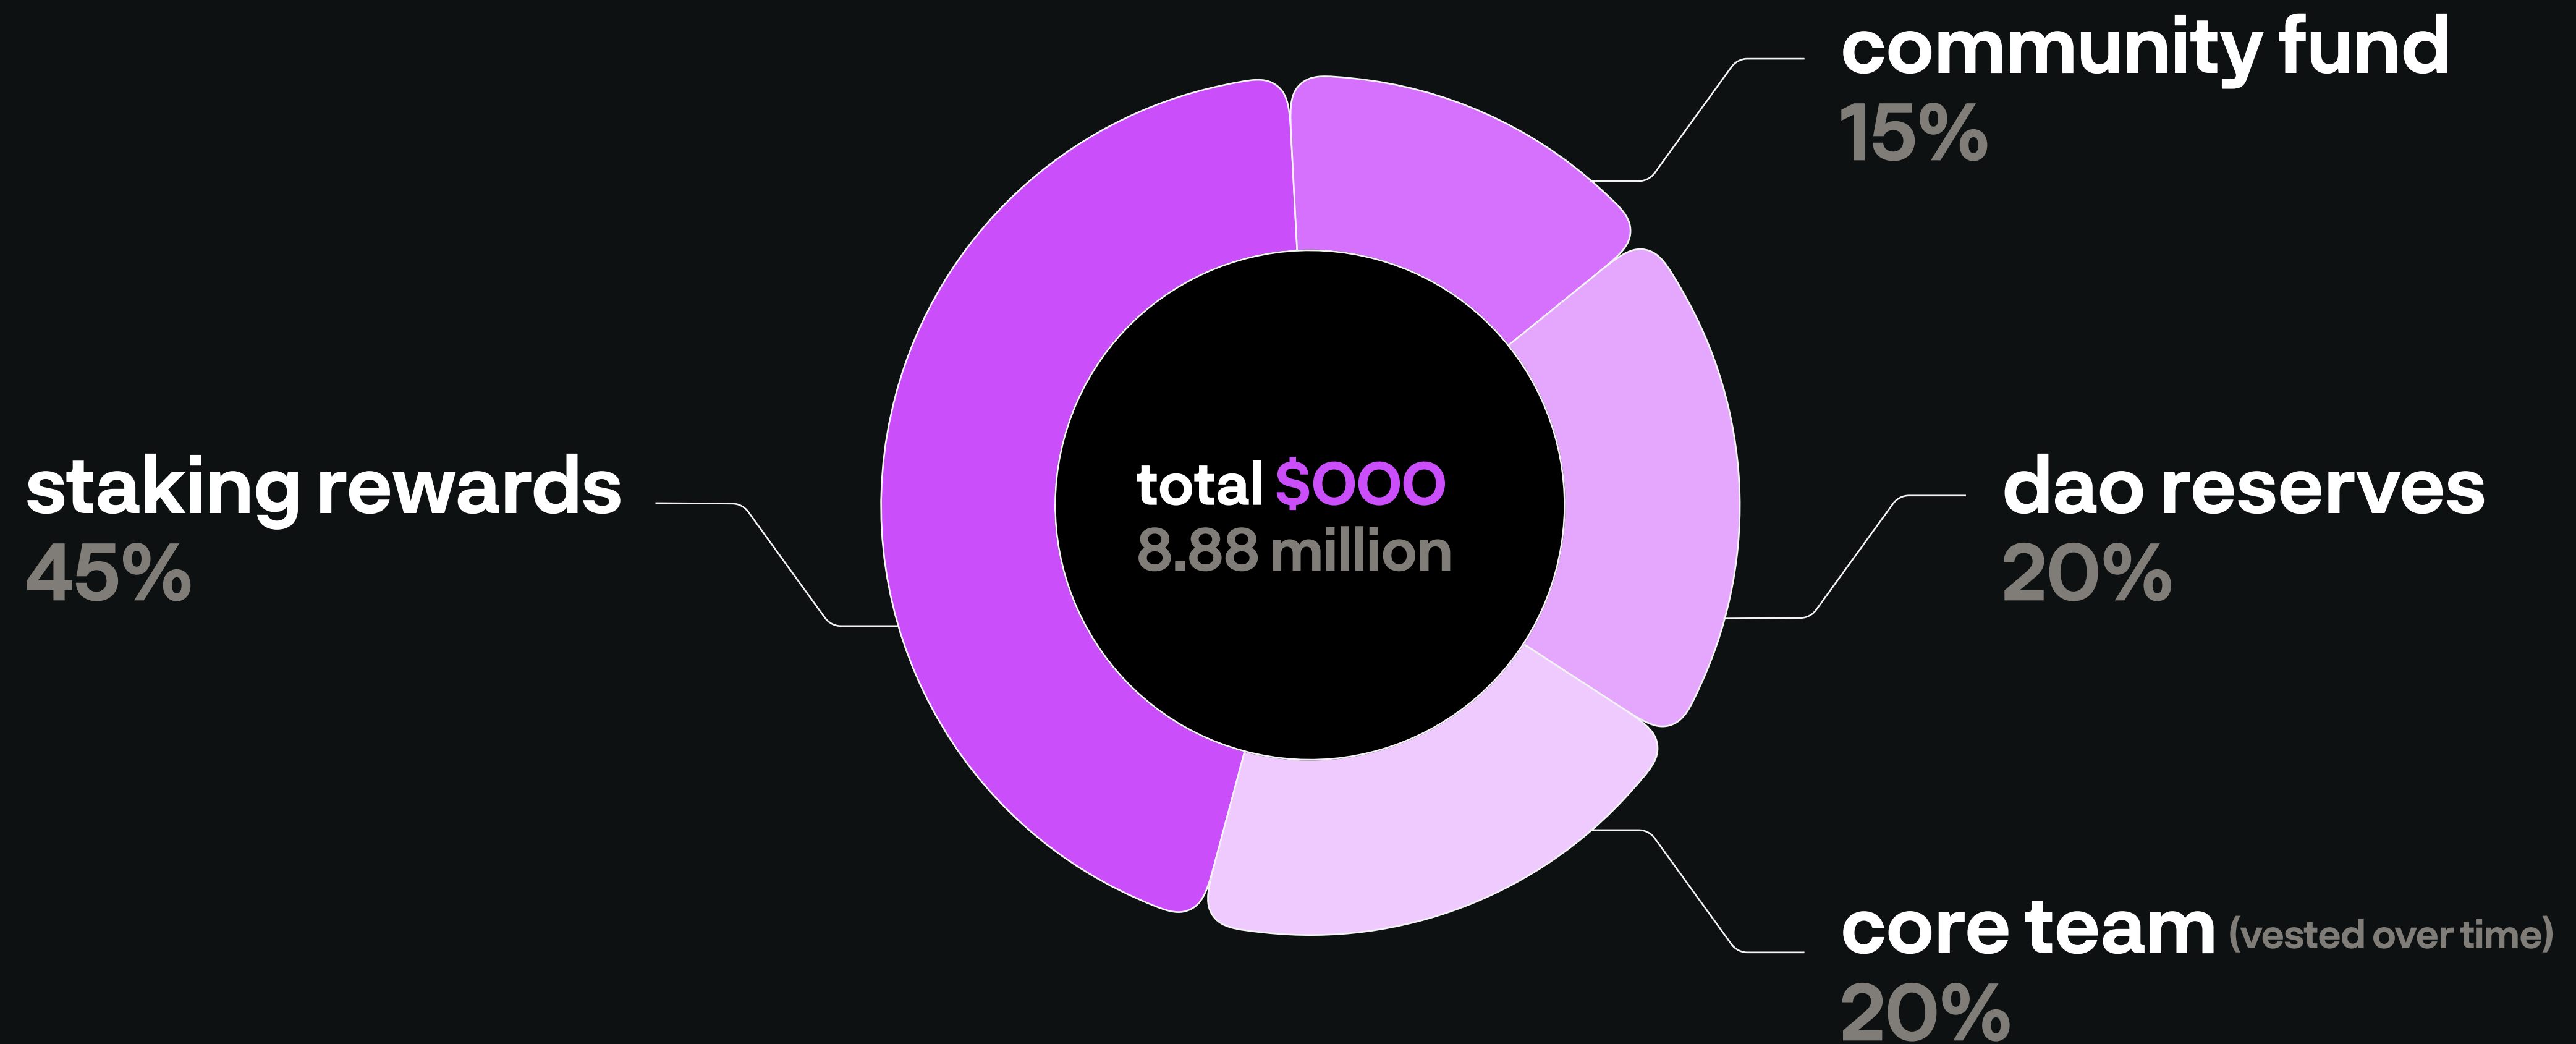

The quantity of **\$000** minted is proportional to the value of the artwork.

## token burning

**\$000** is burned when artwork is redeemed.

This maintains the value of **\$000**, keeping its supply consistent with the basket of artwork it represents.

## token distribution

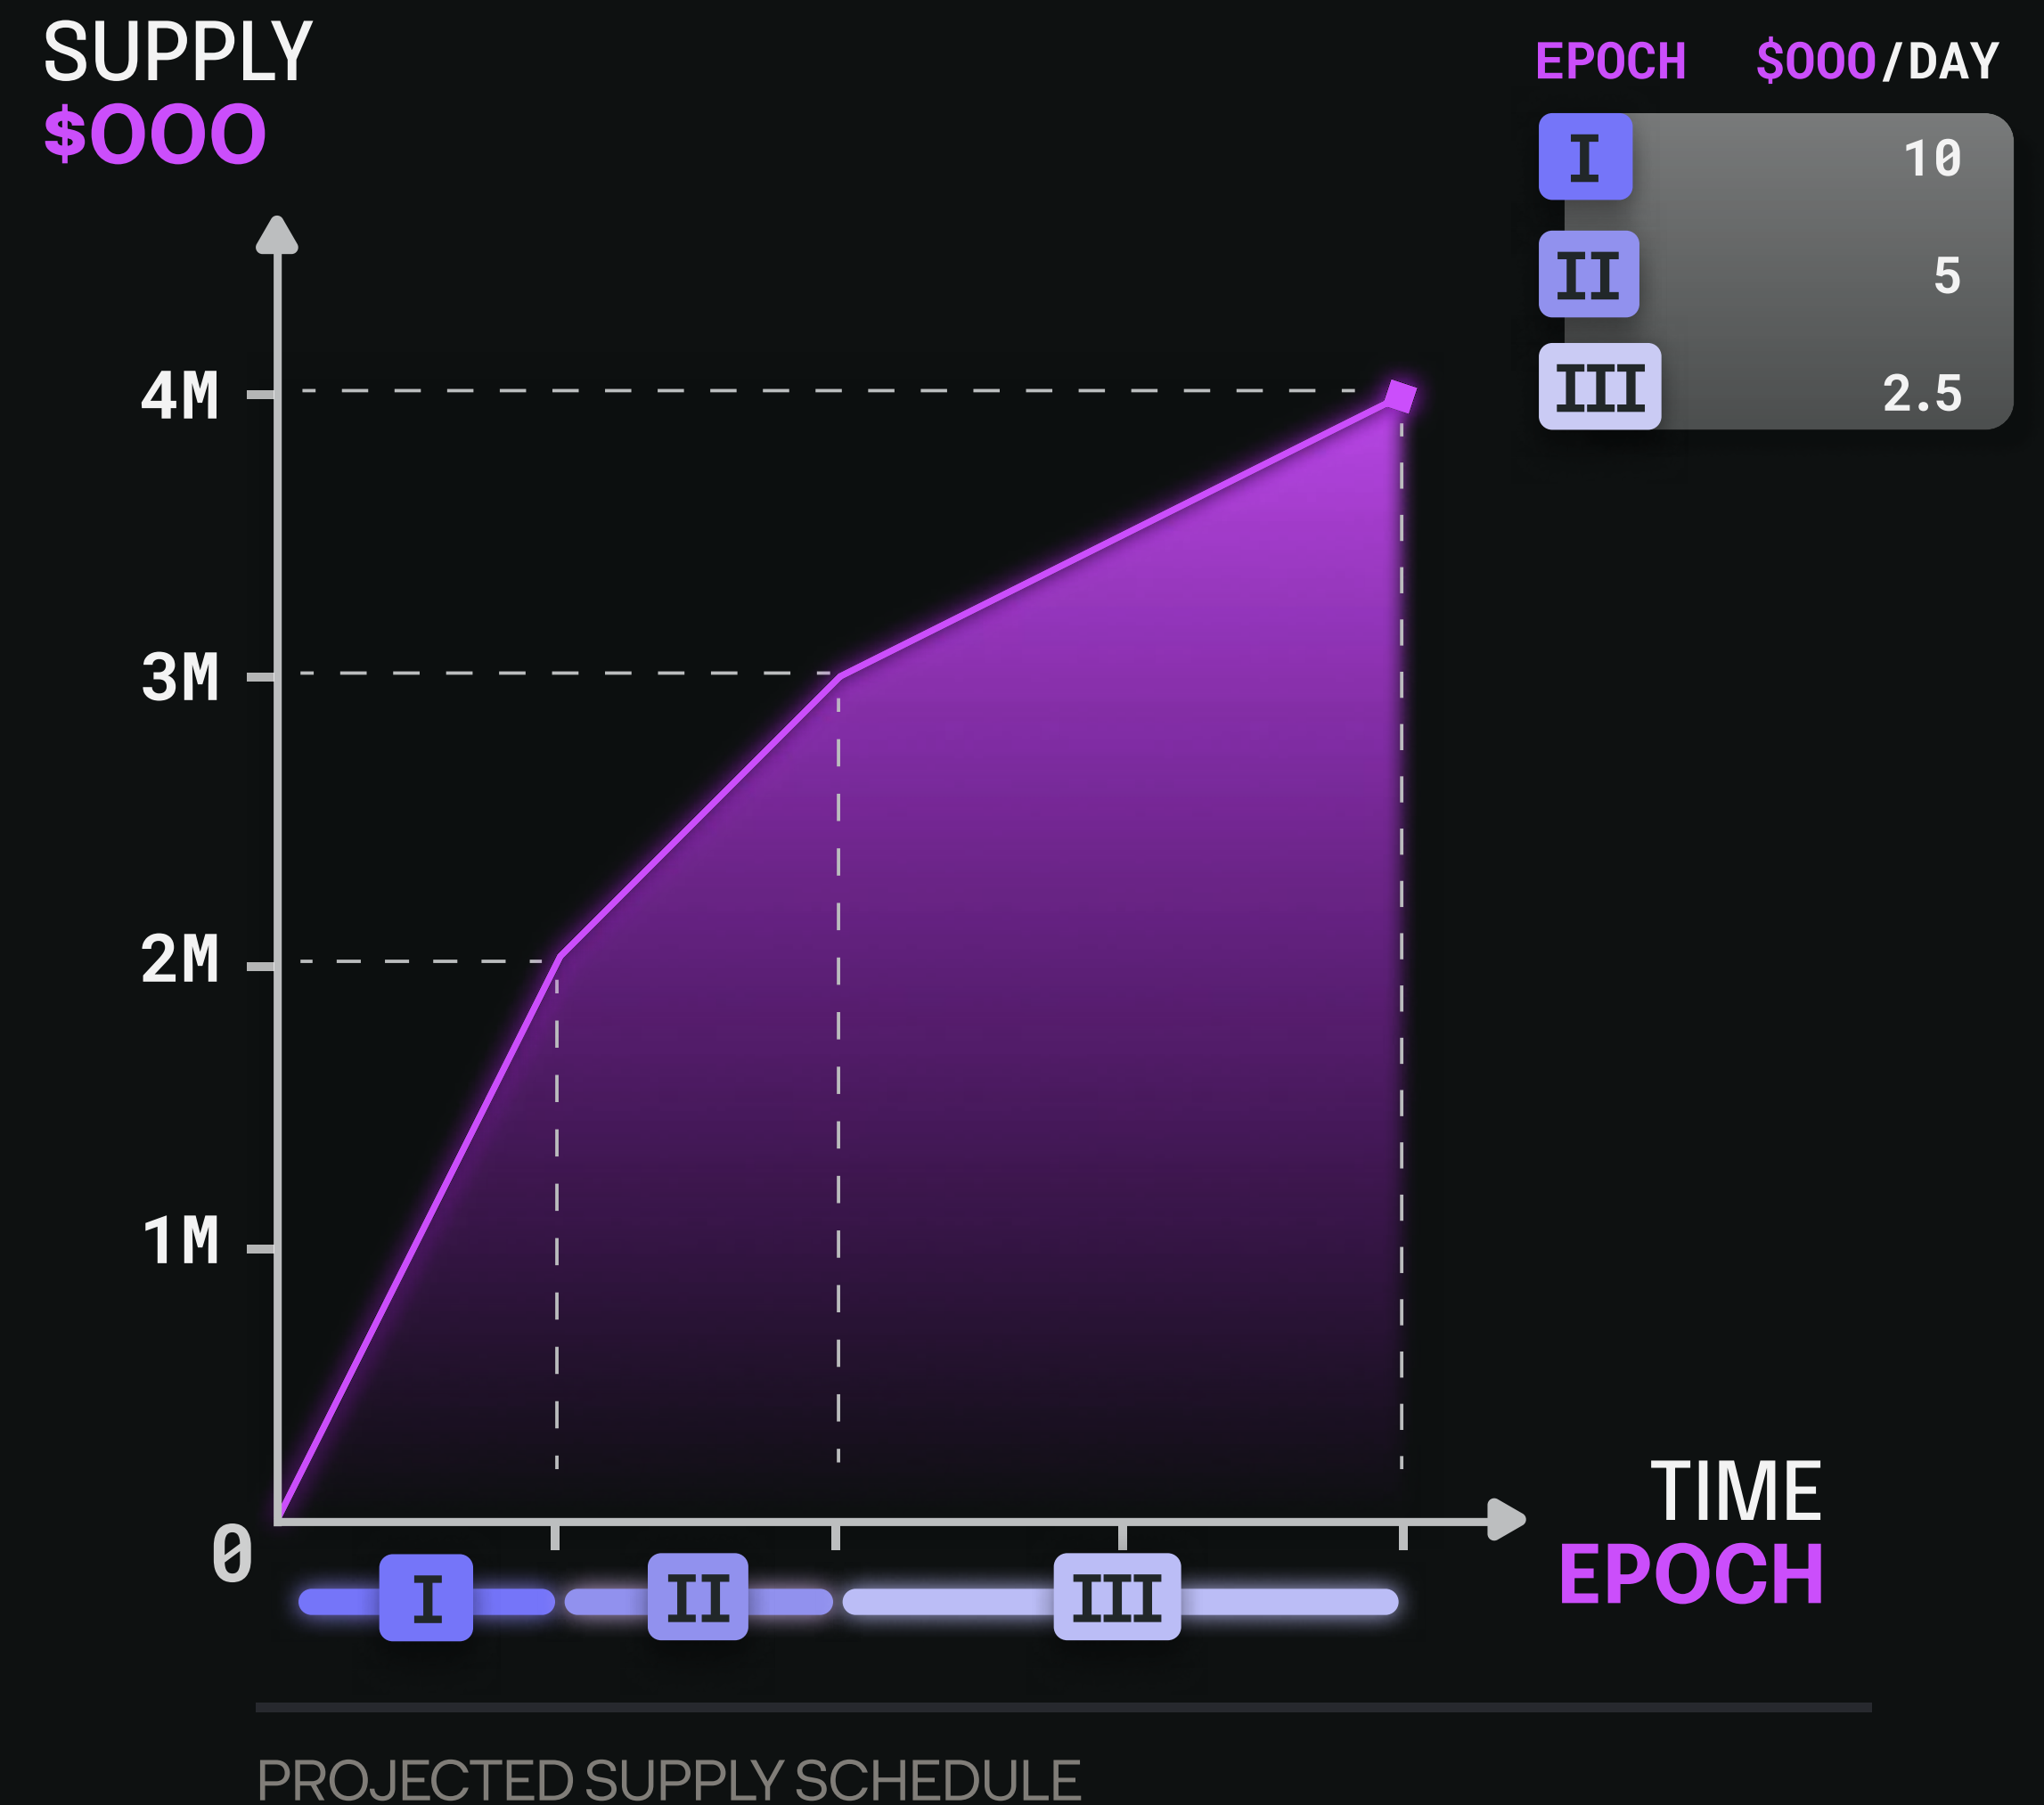

# staking rewards

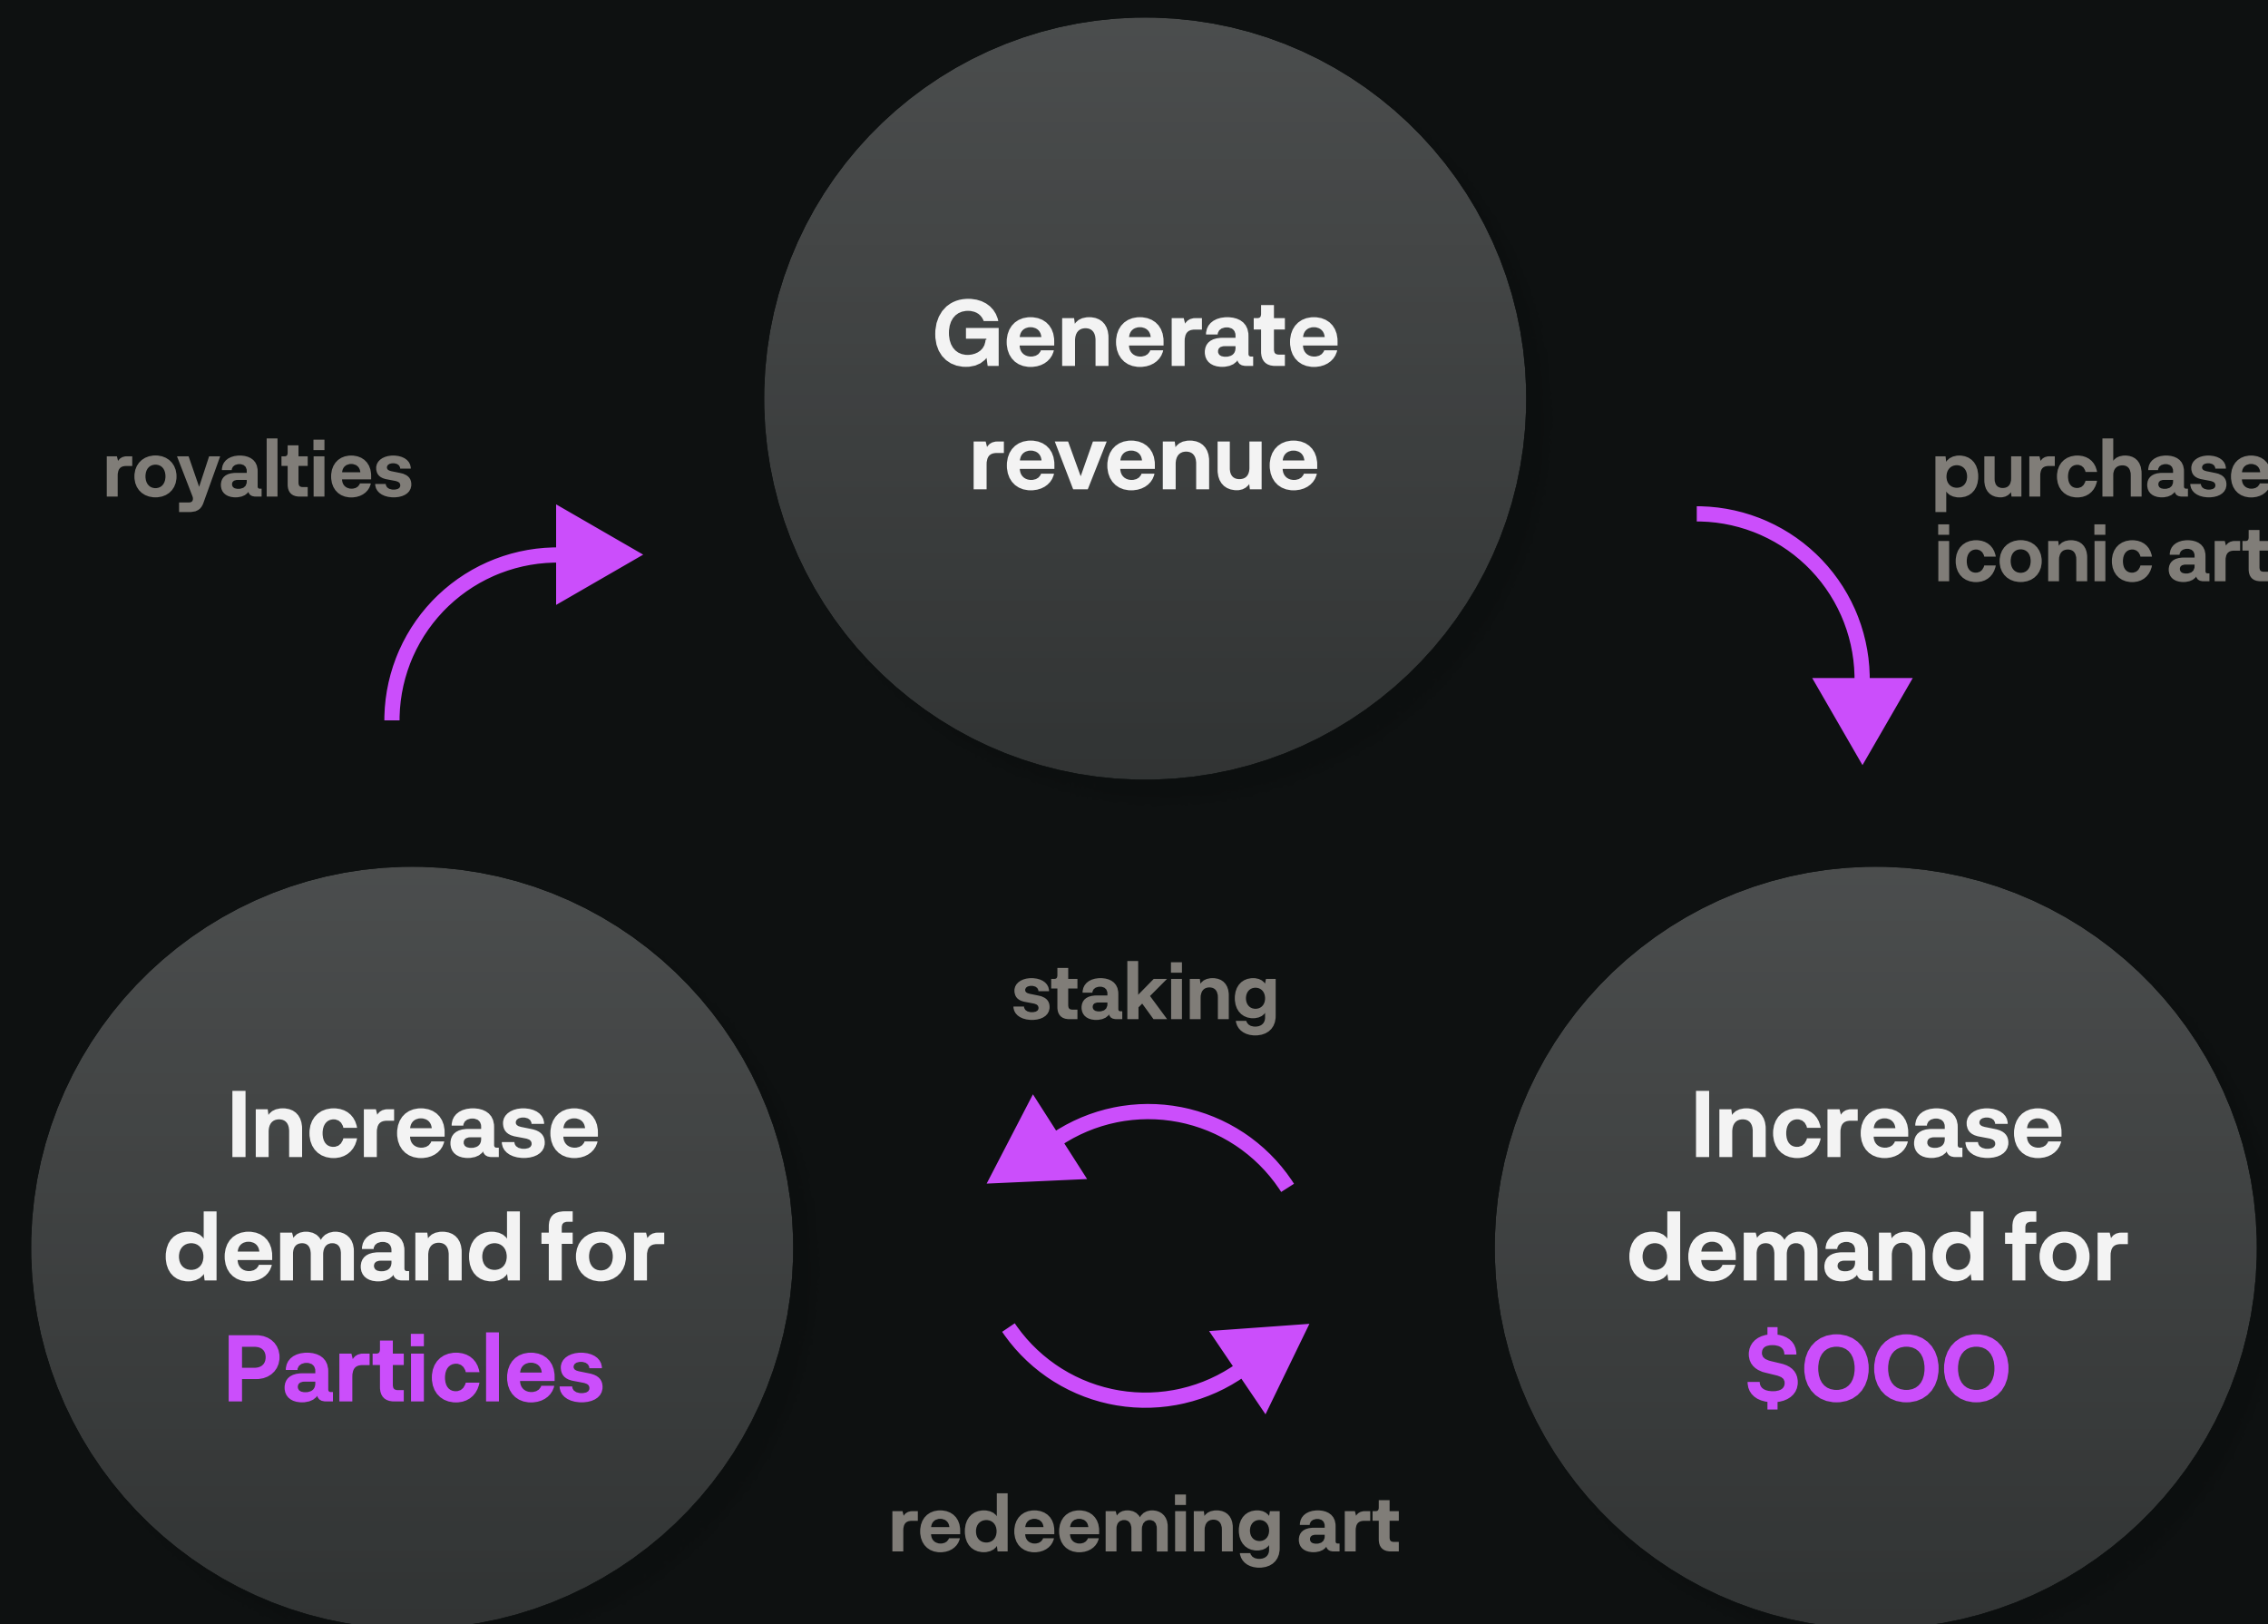

The first supply of \$000 has been generated from artwork funded by the Particles NFT mint.

Staked Particles can earn up to 10 \$000 per day.

Particles NFT Royalties fund the continued generation of \$000 for future supply schedules.

# revenue

# future

## Diversify into other NFT genres

Film, music, metaverses, photography, and fashion NFTs present avenues for diversification into other forms of creative content.

Q3 2022

## Explore a multi-chain future

Other blockchains present an untapped world of new styles, influences, artists, and collectors.

by year 1

## Empowerment & onboarding campaigns

Provide grants, mentoring, & data tools to incentivize the onboarding of new users.

by year 2

## Curate a global network of creators

A unified directory of independent creators with tools for artist discovery, personalized marketplaces, commissions, and more.

by year 3
